

NINE WAYS TO USE YOUR SECURITY SYSTEM TO KNOW IT'S SAFER AND SHOW IT'S SAFER

As building owners and managers work through the myriad of challenges to make buildings, including public and work spaces healthier to help enable a safer return to the workplace, we've outlined nine ways in which your security system can be optimized to help you manage a healthier building and deliver a measurable return on investment.

1	<p>EMPLOY THERMAL SCREENING TO HELP KEEP PEOPLE SAFER</p> <p>Minimize potential exposure to building occupants by pre-screening for elevated body temperatures at entrances and control access based on specific parameters.</p> <p>Learn more</p>
2	<p>AUTOMATE MANAGEMENT OF BUILDING OCCUPANCY DENSITY USING INTELLIGENT VIDEO ANALYTICS</p> <p>Maintaining a safe distance between individuals in a building is recommended by organizations like the U.S. Center for Disease Control to help reduce exposure to infection.</p> <p>Integrated security solutions with video surveillance and advanced video analytics can help manage the flow and count of building occupants based on your threshold for building size and regulatory compliance.</p> <p>Automating people flow and counting helps reduce personnel required to staff doors, and reduces human error associated with manually counting people at entrances. System generated reports can help manage compliance guidelines and gain valuable business insights.</p> <p>Learn more</p>
3	<p>CONTROL BUILDING ENTRY ALLOWING ACCESS ONLY TO AUTHORIZED PERSONNEL</p> <p>Reduce risk of contamination when a person with a potential illness enters a building with a digitized incident workflow that locks out that person's access following detection of an elevated temperature through thermal pre-screening or self identification.</p> <p>Learn more</p>

4	<p>LIMIT INTERACTIONS WITH FREQUENTLY TOUCHED SURFACES WITH FRICTIONLESS SOLUTIONS</p> <p>Identify and allow secure and controlled access to help eliminate physical contact with frequently touched surfaces, using a wide variety of field connected readers and other intelligent controllers.</p> <p>Learn more</p>
5	<p>DETECT POTENTIAL NONCOMPLIANCE TO SOCIAL DISTANCING REGULATIONS</p> <p>Enforcing compliance with new social distancing and face covering regulations is critical to combatting the spread of infection and providing people with the confidence to return to work.</p> <p>Advanced video analytics with intelligent loitering detection allows building operators to monitor large spaces for social distancing adherence, monitor hot spots where chances of exposure is high such as office lobbies and entrance halls of public buildings and trigger alerts if a person remains too long in one area or too close to another person.</p> <p>Learn more</p>
6	<p>MONITOR AND DETECT MASK COMPLIANCE</p> <p>Following guidelines published by the U.S. Center for Disease Control recommending the use of face coverings in public places, many businesses have made it mandatory to wear masks on premises particularly in locations where social distancing guidelines are difficult to follow—for example, elevators and other enclosed spaces.</p> <p>Advanced video analytics and deep learning artificial intelligence make it possible to effectively identify mask compliance, reducing the current manual effort to enforce compliance.</p> <p>Learn more</p>
7	<p>USE YOUR SECURITY SYSTEM TO TRACE CONTACTS POTENTIALLY EXPOSED TO A CONTAGION</p> <p>Support contact tracing with advanced analytics, facial recognition, historical access credential tracking, and incident management workflows.</p> <p>Learn more</p>
8	<p>AUTOMATE COMPLIANCE REPORTING TO HELP OPERATORS MONITOR, REPORT AND TAKE ACTION</p> <p>Reduce costs and streamline processes by easily creating the reports needed for audits and compliance checks related to people counting and flow, social distancing and mask detection.</p> <p>Learn more</p>
9	<p>GAIN VALUABLE SAFETY AND SECURITY INSIGHTS WITH DASHBOARDS THAT ENHANCE SITUATIONAL AWARENESS</p> <p>Reassure occupants, reduce costs and gain valuable safety and security insights on your building's health with the Safety Compliance Dashboard.</p> <p>Learn more</p>

Our professional services team are equipped to support a full audit of your current security system and procedures and recommend solutions that give you the capabilities to help make your business safer today and in the future.
