Bulletin HW23.1

To: All Engineered Systems Distributors (ESD)

VESDA Pipes and Fittings and Xtralis Spare Parts and Accessories to be Available Exclusively through Brooks Equipment

In an effort to improve our overall delivery performance, Honeywell will transition the sales of VESDA pipes and fittings and Xtralis spare parts and accessories to [Brooks Equipment](#) starting April 3, 2023. These products will no longer be offered directly from Honeywell and have been marked accordingly in your Price Book.

Brooks Equipment has over 82 years serving the commercial Fire and Life Safety market and is a longstanding partner of Honeywell Fire. They were selected as the exclusive commercial distribution partner and the official Licensee of select Xtralis products due to their commitment to improving lead times and offering a great customer experience for Honeywell customers. Honeywell ESDs are encouraged to establish direct supply arrangements with Brooks as soon as possible to continue ordering these products.

To setup an account, contact Brooks Equipment at 800-826-3473 or via e-mail at Alarms@BrooksEquipment.com.

For questions about this announcement, please contact your Honeywell Regional Sales Manager or Inside Sales Representative.
