

# Help your school building achieve its potential for safety, security and sustainability

A school is more than a center for learning. It's often a haven for the students who will shape our future. As you strive to create spaces where students and staff can flourish, is your current environment making the grade for safety, security and sustainability? The campus diagram below showcases an optimal layered approach and details the features and benefits that can help contribute to a thriving educational ecosystem.

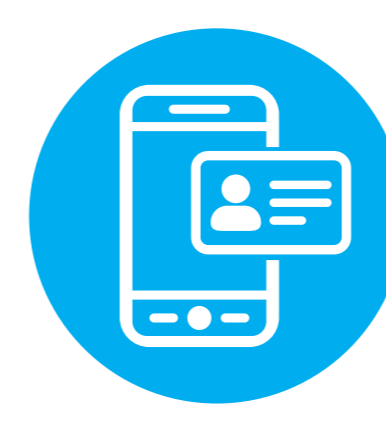

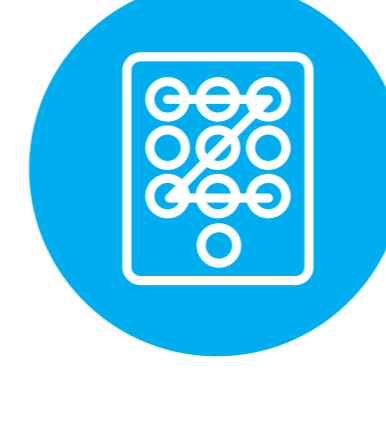

- Safety and security
- Sustainability and operational efficiency
- Student and staff experience

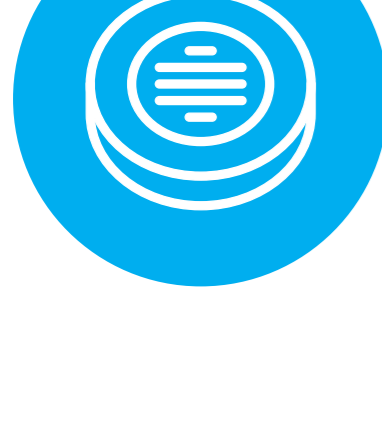

## PARKING LOT

-  **Emergency messaging system:** Integrate with first responders to send notifications and summon immediate assistance
-  **EV chargers:** Manage electricity costs and power use while providing EV charging for the school fleet
-  **Solar arrays:** Save on energy bills and promote a greener environment with automatic switching to alternate energy sources

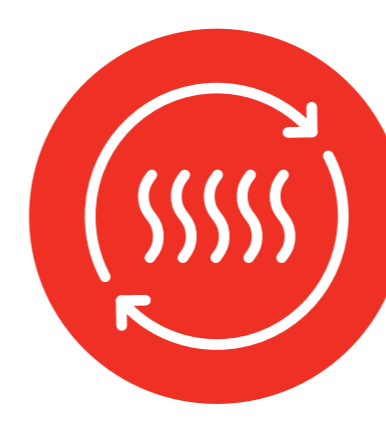

## ENTRANCE

-  **Visitor management system:** Preregister guests, create mobile credentials, use badge printers and track guests, vendors and on-site personnel
-  **Access controls:** Secure the building with readers and keypads to allow minimal egress for heightened safety

## FRONT OFFICE

-  **Intrusion detection motion sensors:** Detect suspicious movements to reduce the likelihood of theft, vandalism and other criminal activities
-  **Fire life safety detection and evacuation:** Protect students and staff with an end-to-end system from early warnings through evacuation
-  **Public address system:** Manage daily communications and facilitate a quick response by broadcasting alerts throughout the campus

## GYM/CAFETERIA

-  **Occupancy detection sensors:** Adjust airflow to enhance ventilation and air quality
-  **Thermostats:** Create more comfortable environments with proper temperature control
-  **Lighting:** Illuminate spaces for maximum visibility and energy efficiency

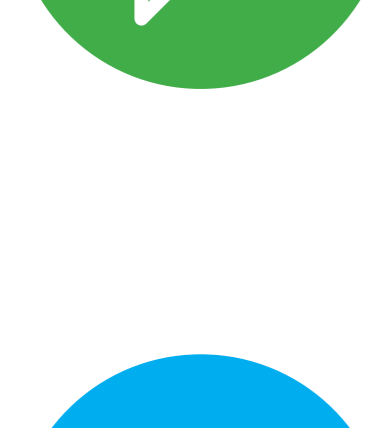

## HALLWAY

-  **Digital signage:** Help visitors easily find their way around campus to enhance security and overall experience
-  **Security cameras:** Foster safe environments and minimize disruptive behavior by monitoring public areas through CCTV capabilities
-  **Gunshot detection system:** Activate emergency protocols and reduce response time in the event of a crisis

## CLASSROOMS

-  **Duress buttons:** Support safety efforts and meet local regulations by summoning help quickly with the push of a button
-  **Lighting controls:** Improve efficiency by managing lighting based on classroom patterns and schedules
-  **Air filtration:** Improve air quality to create a healthier learning environment

## MECHANICAL ROOM

-  **Energy management software:** Connect systems to optimize energy usage and save on energy bills
-  **Preventative maintenance systems:** Receive advance alerts for routine maintenance and repair systems for optimal performance
-  **Cybersecurity:** Safeguard operational technology and prevent costly breaches and disruptions

Interested in learning more about how you can create a school environment that is more safe, secure and sustainable? Honeywell can help customize relevant building systems to fit your unique school environment and help find ways to fund your projects. Find out more about Honeywell's comprehensive services and practical solutions to support a more optimal learning environment today.
