TRADE UP NOW:
WEB-8000 & RIO BUNDLE

EASY MIGRATION TO N4

The latest version of Niagara Framework® have features and functionality that make buildings more intelligent and cyber secure and building engineers and facilities staff more productive. Don't let the Niagara deployments that you oversee fall behind. The first step toward migrating from AX to N4 is replacing your Legacy WEB's with WEB-8000. As this often involves the additional cost of IO-R replacement, we wanted to make the whole hardware investment a better fit for your budget. So, we're offering a limited-time promotion on WEB-8000 and IO-R modules. See the Details section below for more information and promo codes.

NOTE: WEBs AX End of Life date is in July 2021. You will want to migrate to an N4 version of Niagara Framework soon. This program is your incentive to start taking steps toward migration today.

2019 AX-TO-N4 MIGRATION PROGRAM

When you order 5 or more WEB-8000 to replace legacy WEBs (AX generations 2-7), now through December 13, 2019 you can receive a 15% discount, or a 10% discount before March 31, 2020. Additionally, we're offering a 20% discount on all IO-R units that are ordered with a WEBs AX to N4 upgrade through June 30, 2020.
